**NEW QUESTION: 1**You need to create a DAX measure in the data model that only allows users to see projections at the appropriate levels of granularity.How should you complete the measure? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.NOTE: Each correct selection is worth one point.**Answer:** Explanation: ExplanationScenario: Revenue projections are set at the monthly level and summed to show projections for the quarter.Box 1: IFBox 2: ISFILTEREDISFILTERED returns TRUE when columnName is being filtered directly. If there is no filter on the column or if the filtering happens because a different column in the same table or in a related table is being filtered then the function returns FALSE.Box 3: SUMReference:  
<https://docs.microsoft.com/en-us/dax/isfiltered-function-dax>

**NEW QUESTION: 2**You plan to deploy SQL Server 2014.You identify the following security requirements for the deployment:\* Users must be prevented from intercepting and reading the T-SQL statements sent from the clients to the database engine.\* All database files and log files must be encrypted if the files are moved to another disk on another server.You need to identify which feature meets each security requirement. The solution must minimize processor overhead.Which features should you identify? To answer, drag the appropriate feature to the correct requirement in the answer area.**Answer:** Explanation:Explanation- Secure Sockets Layer (SSL) encryption enables transmitting encrypted data across the network between an instance of SQL Server and a client application.- Transparent data encryption (TDE) performs real-time I/O encryption and decryption of the data and log files.

### **NEW QUESTION: 3**
