NEW QUESTION: 2 **A. Option D B. Option C C. Option B D. Option A** **Answer: D** **Explanation:** Explanation* The extended rights policy of a template controls how content licenses are to be implemented. The extended rights policy template settings are specified by using the Active Directory Rights Management Services (AD RMS) administration site. The available settings control persistence of author rights, whether trusted browsers are supported, license persistence within the content, and enforcement of any application-specific data.* You can add trust policies so that AD RMS can process licensing requests for content that was rights protected. You are developing an application that applies a set of governance policies for Proseware's internal services, external services, and applications. The application will also provide a shared library for common functionality. Requirements Policy service You develop and deploy a stateful ASP.NET Core 2.1 web application named Policy service to an Azure App Service Web App. The application reacts to events from Azure Event Grid and performs policy actions based on those events. The application must include the Event Grid Event ID field in all Application Insights telemetry. Policy service must use Application Insights to automatically scale with the number of policy

actions that it is performing. PoliciesLog policyAll Azure App Service Web Apps must write logs to Azure Blob storage. All log files should be saved to a container named logdrop. Logs must remain in the container for 15 days. Authentication eventsAuthentication events are used to monitor users signing in and signing out. All authentication events must be processed by Policy service. Sign outs must be processed as quickly as possible. PolicylibYou have a shared library named PolicyLib that contains functionality common to all ASP.NET Core web services and applications. The Policy Lib library must* Exclude non-user actions from Application Insights telemetry.* Provide methods that allow a web service to scale itself.* Ensure that scaling actions do not disrupt application usage. OtherAnomaly detection serviceYou have an anomaly detection service that analyzes log information for anomalies. It is implemented as an Azure as a web service. If an anomaly is detected, an Azure Function that emails administrators is called by using an HTTP WebHook. Health monitoringAll web applications and services have health monitoring at the /health service endpoint. IssuesPolicy lossWhen you deploy Policy service, policies may not be applied if they were in the process of being applied during the deployment. Performance issueWhen under heavy load, the anomaly detection service undergoes slowdowns and rejects connections. Notification latencyUsers report that anomaly detection emails can sometimes arrive several minutes after an anomaly is detected.
