NEW QUESTION: 2 A 24-year-old graduate student recognizes that he has a phobia. He suffers severe anxiety when he is in darkness. It has altered his lifestyle because he is unable to go to a movie theater, concert, and other events that may require absence of light. The client is seeking assistance because he is no longer able to socialize with friends due to his phobia. The psychologist working with him is using desensitization. He has asked the nursing staff to assist the client in muscle relaxation techniques. What result would indicate client education has been successful? **A.** He states that he no longer fears dark places. **B.** He enters a movie theater, sits in his chair, and replaces anxiety with relaxation as the theater darkens. **C.** He takes a part-time job as a photographic assistant. His job necessitates his working in a darkroom. **D.** He enters a concert, but as the lights dim, he does not experience anxiety. **Answer: B** Explanation: Explanation/Reference: Explanation: (A) This situation provides specific evidence that the client is able to integrate muscle relaxation technique into his lifestyle to alleviate anxiety. (B) The client may not experience anxiety at the concert, but there is no evidence regarding the technique that he used to alleviate anxiety. (C) The client may state he no longer experiences anxiety, but there is no evidence demonstrating this. He may be denying anxiety to discontinue therapy prematurely. (D) Does he experience anxiety in the darkroom? He may have taken this job to force himself to deal with the phobia directly.
