NEW QUESTION: 1 Amazon has three AWS accounts. They have created separate IAM users within each account. Amazon wants a single IAM login URL such as <https://Amazon.signin.aws.amazon.com/console/> for use by IAM users in all three accounts. How can this be achieved? **A.** Create the same account alias with each account **B.** Create the S3 bucket with an alias name and use the redirect rule to forward requests to various accounts **C.** Merge all the accounts with consolidated billing **D.** It is not possible to have the same IAM account login URL for separate AWS accounts **Answer: D** **Explanation:** Users can create an alias for their accounts, but the alias should be unique to the account. For example the alias "Amazon" can be assigned to only one account. If a user wants the URL of the AWS IAM sign-in page to have a company name instead of the AWS account ID, he can create an alias for his AWS account ID.
