NEW QUESTION: 2A Profile is a collection of settings and permissions that determine what the user can do with records they have access to and how they view those records.**A.** False**B.** True
Answer: B

NEW QUESTION: 3Which describes risk appetite?**A.** The risks to the expected benefits**B.** The budget set aside for potential changes to the scope of the project**C.** A common set of risk categories, risk scales and evaluation techniques**D.** An organization's unique attitude towards risk-taking**Answer: D**

NEW QUESTION: 4Information for detecting unauthorized input from a terminal would be BEST provided by the:**A.** automated suspense file listing**B.** transaction journal**C.** user error report**D.** console log printout.**Answer: B**
Explanation:Explanation/Reference:Explanation:The transaction journal would record all transaction activity, which then could be compared to the authorized source documents to identify any unauthorized input. A console log printout is not

the best, because it would not record activity from a specific terminal. An automated suspense file listing would only list transaction activity where an edit error occurred, while the user error report would only list input that resulted in an edit error.
