NEW QUESTION: 1 취약점을 평가할 때 다음 중 고려해야 할 사항은 무엇입니까? **A.** 위협 매핑 **B.** 위협 수용 기준 **C.** 보호 선택 **D.** 위협 식별 및 검증 **Answer: D** Explanation: Reference:

https://books.google.com.pk/books?id=9gCn86CmsNQC_pg=PA478&lpg=PA478&dq=CISSP+taken+into+account+when+assessing+vulnerability_&ots=riGvVpNN7I&sig=ACfU3U1isazG0OJLZdAAy91LvAW_rbXdaQved=2ahUKEwj6p9vg4qnpAhUNxYUKHdODDZ4Q6AEwDHoECBMQAQ#v=onepage&q=CISSP%20taken%20into%20account%20when%20assessing%20vulnerability&f=false

NEW QUESTION: 2 You will be attending a conference, and you want to be able to capture information about the prospects you will meet. You need to be able to upload the lead information into Microsoft Dynamics 365 with the Import Data Wizard. Which two formats can you use? Each correct answer presents a complete solution. **A.** Access Database (.accdb) **B.** Excel 97-2003 Spreadsheet (.xls) **C.** compressed (.zip) **D.** comma-separated values (.csv) **Answer: C,D** Explanation:

<https://www.microsoft.com/en-us/dynamics/crm-customer-center/import-accounts-leads-or-other-data.aspx>

NEW QUESTION: 3 You are the security director for a chain of automotive repair centers across several states. Your company uses a cloud SaaS provider, for business functions that cross several of the locations of your facilities, such as: 1) ordering parts 2) logistics and inventory 3) billing, and 4) marketing. The manager at one of your newest locations reports that there is a competing car repair company that has a logo that looks almost exactly like the one your company uses. What will most likely affect the determination of who has ownership of the logo? Response: **A.** Whoever first used the logo **B.** Whoever first applied for legal protection of the logo **C.** Whichever entity has the most customers that recognize the logo **D.** The jurisdiction where both businesses are using the logo simultaneously **Answer: B**

NEW QUESTION: 4 Note: This question is part of a series of questions that present the same

scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You administer an Azure subscription for your company. You plan to deploy a virtual machine (VM) to Azure. The VM environment must provide 99.95% uptime. A single switch outage must not cause the VM environment to be unavailable. The VM must not be offline due to installation of an update that requires a reboot. You need to configure the environment. Solution: Create two availability sets. Place a VM in each availability set. Does the solution meet the goal? **A. Yes** **B. No** **Answer: B**
Explanation: Explanation/Reference: Explanation: The VM should be within the same availability set. An Availability Set is a logical grouping capability that you can use in Azure to ensure that the VM resources you place within it are isolated from each other when they are deployed within an Azure datacenter. Azure ensures that the VMs you place within an Availability Set run across multiple physical servers, compute racks, storage units, and network switches. If a hardware or Azure software failure occurs, only a subset of your VMs are impacted, and your overall application stays up and continues to be available to your customers. Availability Sets are an essential capability when you want to build reliable cloud solutions.
