We will respect every choice of SAP C\_THR89\_2405 test braindumps materials you make and will spare no effort to provide the best service for you, Full refund if you fail your examination.

Only by improving our own soft power can we ensure we are not eliminated [AD0-E722 Latest Test Practice](#) by the market, But when talking about the SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Workforce Analytics and Planning exam test, many people feel headache and don't know how to prepare for it.

**NEW QUESTION: 1**You want to reduce fragmentation and reclaim unused space for the sales table but not its dependent objects. During this operation, you want to ensure the following:  
i. Long-running queries are not affected.  
ii. No extra space is used.  
iii. Data manipulation language (DML) operations on the table succeed at all times throughout the process.  
iv. Unused space is reclaimed both above and below the high water mark.  
Which alter TABLE option would you recommend?  
**A.** ROW STORE COMPRESS BASIC  
**B.** SHRINK SPACE COMPACT  
**C.** DEALLOCATE UNUSED  
**D.** SHRINK SPACE CASCADE  
**Answer: B**  
**Explanation:** Explanation The COMPACT clause lets you divide the shrink segment operation into two phases. When you specify COMPACT, Oracle Database defragments the segment space and compacts the table rows but postpones the resetting of the high water mark and the deallocation of the space until a future time. This option is useful if you have long-running queries that might span the operation and attempt to read from blocks that have been reclaimed. The defragmentation and compaction results are saved to disk, so the data movement does not have to be redone during the second phase. You can reissue the SHRINK SPACE clause without the COMPACT clause during off-peak hours to complete the second phase.
