Our effort in building the content of our H19-402_V1.0 study materials lead to the development of learning guide and strengthen their perfection, To help you pass more smoothly [D-AV-OE-23 Test Simulator Free](#) we also provide the latest updates and changes for free lasting for one year.

And if you buy the electronic version of the materials, it is difficult to draw marks on them, but H19-402_V1.0 exam questions provide you with a PDF version, so that you can print out the information, **New H19-402_V1.0 Exam Experience** not only conducive to your mark, but also conducive to your memory of important knowledge.

Estruturit is admired by all our customers **New H19-402_V1.0 Exam Experience** for our experts' familiarity and dedication with the industry all these years.

NEW QUESTION: 1

ある会社が、最近、いくつかの主要ベンダーのための新しい請求請求書ウェブサイトを立ち上げました。

サイバーセキュリティアナリストは、ウェブサイトの実行速度が遅く、ページのタイムアウトが発生する可能性があるという声を受けています。

アナリストは、Webサイトが何百万というリクエストを受け取り、サービスが利用できなくなったことに気づいています。

次のうちウェブサイトの可用性を維持するために実装できるものはどれですか？ **A. DMZ** **B.**

Whitelisting **C. MAC filtering** **D. Honeypot** **E. VPN** **Answer: B**

NEW QUESTION: 2 A network technician is attempting to locate a switch connected to the fourth floor west side of the building. Which of the following will allow quick identification of the switch, when looking at a logical diagram? **A. Building layout** **B. Naming conventions** **C. Packet sniffing** **D. Patch panel labeling** **Answer: B** **Explanation:** The building in this question has several floors and the floors are large enough to be identified by area such as 'west side' etc. It is likely that a logical diagram of the network in such a building would be quite complicated and the network is likely to have several switches. A naming convention is a standard for

naming items, in this case, networking components. When it comes to naming switches, using names like Switch1, Switch2 etc. for example won't help when you need to know where the switches are located. In a building with multiple floors with each floor large enough to be defined by area names, you could use a naming convention like SW1-FL4-WS where SW1 identifies the item as a Switch with the number 1, FL4 identifies the location as Floor 4 and WS further identifies the location as West Side. Using this convention, switch number 2 on the third floor east side would be named SW2-FL3-ES.

NEW QUESTION: 3 Your network contains an Active Directory domain named contoso.com. The domain contains an IP Address Management (IPAM) server that uses a Windows Internal Database. You install a Microsoft SQL Server 2012 instance on a new server. You need to migrate the IPAM database to the SQL Server instance. Which cmdlet should you run? **A.**

Set-IpamConfiguration **B.** Move-IpamDatabase **C.** Disable-IpamCapability **D.** Update-IpamServer

Answer: B
