**NEW QUESTION: 1** Which sections are available to an employee in the Global Benefits Employee Benefits screen? There are 3 correct answers to this question.  
**A.** Claims and Enrollments  
**B.** Spot Bonus  
**C.** Reimbursements and Allowances  
**D.** Pension Plans  
**E.** Payslip  
**Answer: A,C,D**

**NEW QUESTION: 2** A user has configured ELB with Auto Scaling. The user suspended the Auto Scaling terminate process only for a while. What might the Availability Zone Rebalancing process (AZRebalance) consequently cause during this period?  
**A.** Auto Scaling will not launch or terminate any instances  
**B.** It is not possible to suspend the terminate process while keeping the launch active  
**C.** Auto Scaling will keep launching instances till the maximum instance size  
**D.** Auto Scaling might allow the number instances in an Availability Zone to remain higher than the maximum size  
**Answer: D**  
**Explanation:** Auto Scaling performs various processes, such as Launch, Terminate, and Availability Zone Rebalance (AZRebalance). The AZRebalance process type seeks to maintain a balanced number of instances across Availability Zones within a region. If the user suspends the Terminate process, the AZRebalance process can cause the Auto Scaling group to grow up to ten percent larger than the maximum size. This is because Auto Scaling allows groups to temporarily grow larger than the maximum size during rebalancing activities. If Auto Scaling cannot terminate instances, the Auto Scaling group could remain up to ten percent larger than the maximum size until the user resumes the Terminate process type.

**NEW QUESTION: 3** Which of the following would MOST effectively control the usage of universal storage bus (USB) storage devices?  
**A.** Software for tracking and managing USB storage devices  
**B.** Policies that require instant dismissal if such devices are found  
**C.** Searching personnel for USB storage devices at the facility's entrance  
**D.** Administratively disabling the USB port  
**Answer: A**  
**Explanation:** Explanation/Reference: Explanation: Software for centralized tracking and monitoring would allow a USB usage policy to be applied to each user based on changing business requirements, and would provide for monitoring and reporting exceptions to management. A policy requiring dismissal may result in increased employee attrition and business requirements would not be properly addressed. Disabling ports would be complex to manage and might not allow for new business needs. Searching of personnel for USB storage devices at the entrance to a facility is not a practical solution since these devices are small and could be easily hidden.
