NEW QUESTION: 1Ken, an entrepreneur in Leeds finds the quality of the tea locally available so low, that he decides to research superior teas around the world. He decides to market, sell and distribute these superior teas via the web. His market strategy is to offer superior products on a well-designed website with graphics that are fast to load, has high availability, superior usability and fast response times. The website will offer the following:- An innovative interactive catalogue of teas, which not only enables customers to buy the product, but also enables them to provide feedback by rating the teas (which will influence his stock purchasing levels)- Provide the customer with the ability to use secure credit card transactions- Provide the customer to give general feedbackKen selects an iterative model for the development of the prototypes. The team consists of three developers that are experienced in web development. Ken, although he doesn't have technical skillset, is concerned with quality. He doesn't believe a lot of documentation is necessary and he wants the website to be completed quickly. The test basis contains the following:- Story boards that show the information flow and page links through the site- HTML pages developed to date.- A statement of non-functional requirements. With the strategy taking shape, Ken asks your advice on the specific testing techniques that should be used to complete the required testing, bearing in mind the nature of the application and the nature of Ken's overall objectives. Which of the following represents the best choice of testing techniques in this scenario?**A.** State transition testing to test the web site's availability statuses**B.** Decision testing to ensure that there is no redundant code**C.** Equivalence partitioning and boundary value analysis using the storyboard ideas as a basis to maximize functional coverage.**D.** Exploratory testing to maximize the value of the team' experience

Answer: D
