Are you satisfied with your current learning state, Online and offline study have [Test D-PDPS4400-A-01 Guide Online](#) respective benefits, LPI Certification Collaboration Open Source Essentials Exam 050 dumps exam preparation kit contains all the necessary Open Source Essentials Exam 050 questions that you need to know.

You will get 3 months of free auto-updates after your purchase.

NEW QUESTION: 1You administer a Virtual Desktop Infrastructure (VDI). The environment runs on a Windows Server 2012 R2 server that has the Hyper-V role installed. You use Systems Center 2012 R2 Operations Manager to troubleshoot performance issues. Some users of dedicated virtual desktops report slow response times within their sessions. Operations Manager reports indicate that a performance bottleneck exists at the storage layer. You need to manage the amount of input/output operations per second (IOPS) that the dedicated desktop pool can generate. What should you do? **A.** Enable Resource Metering on the Hyper-V host server. **B.** Configure Operations Manager to monitor virtual machine disk performance on the Hyper-V host server. Configure monitoring alerts for virtual machine use greater than the allowed IOPS. **C.** For each virtual machine, enable Storage Quality of Service (QoS). Set a minimum and maximum value for IOPS. **D.** For each virtual machine, enable Network Quality of Service (QoS). Set a minimum and maximum value for the Mbps property. **Answer: C** Explanation: Explanation/Reference: Ref: <http://technet.microsoft.com/en-us/library/dn282281.aspx>

NEW QUESTION: 2 Drag and drop the statements about authentication, authorization and accounting from the left into the correct categories on the right. **Answer:** Explanation: Explanation AAA offers different solutions that provide access control to network devices. The following services are included within its modular architectural framework: + Authentication - The process of validating users based on their identity and predetermined credentials, such as passwords and other mechanisms like digital certificates. Authentication controls access by requiring valid user credentials, which are typically a username and password. With RADIUS, the ASA supports PAP, CHAP, MS-CHAP1, MS-CHAP2, that means Authentication supports encryption. + Authorization - The method by which a network device assembles a set of attributes that regulates what tasks the user is authorized to perform. These attributes are

measured against a user database. The results are returned to the network device to determine the user's qualifications and restrictions. This database can be located locally on Cisco ASA or it can be hosted on a RADIUS or Terminal Access Controller Access-Control System Plus (TACACS+) server. In summary, Authorization controls access per user after users authenticate. + Accounting - The process of gathering and sending user information to an AAA server used to track login times (when the user logged in and logged off) and the services that users access. This information can be used for billing, auditing, and reporting purposes.

NEW QUESTION: 3 When a significant security breach occurs, what should be reported FIRST to senior management?
A. A summary of the security logs that illustrates the sequence of events
B. A business case for implementing stronger logical access controls
C. An explanation of the incident and corrective action taken
D. An analysis of the impact of similar attacks at other organizations
Answer: C
Explanation: Explanation When reporting an incident to senior management, the initial information to be communicated should include an explanation of what happened and how the breach was resolved. A summary of security logs would be too technical to report to senior management. An analysis of the impact of similar attacks and a business case for improving controls would be desirable; however, these would be communicated later in the process.

NEW QUESTION: 4 Amazon

S3に関連する最近のセキュリティ監査の後、ある会社は、データが適切に保護されているかどうかを判断するために、S3バケットを確認する支援を求めています。リストの最初のS3バケットには、次のバケットポリシーがあります。

このバケットポリシーは、データが宣伝にアクセスできないようにするのに十分ですか？ **A.**

はい、バケットポリシーにより、S3バケットACLまたはオブジェクトACLが設定されているにもかかわらず、バケット全体がパブリックにアクセス可能になります。 **B.**

はい、S3バケットACLとオブジェクトACLの構成に関係なく、バケット内のどのデータもパブリックにアクセスできません。 **C.**

いいえ、IAMユーザーポリシーを最初に調べて、データがパブリックにアクセス可能かどうかを判断する必要があります。 **D.**

いいえ、S3バケットACLとオブジェクトACLを最初に調べて、データがパブリックにアクセス可能かどうかを判断する必要があります。 **Answer: A**
