NEW QUESTION: 1 Which three of the following statements correctly describe the Cisco router portfolio? (Choose three.)
A. The Cisco 1900 router series supports Cisco Unified Communications Manager Business Edition 6000.
B. The Cisco 1900, 2900, and 3900 router series provide video and collaboration features.
C. The Cisco 2900 and 3900 router series support Cisco UCS Express.
D. The Cisco 800 and 1900 router series both offer entry-level application optimization features.
E. All Cisco ISR G2 routers provide network automation, consolidated VPN, and security features.
Answer: C,D

NEW QUESTION: 2 Which of the following is a BEST practice when dealing with user accounts that will only need to be active for a limited time period?
A. When creating the account, set the account to not remember password history.
B. When creating the account, set a password expiration date on the account.
C. When creating the account, set the account to have time of day restrictions.
D. When creating the account, set an expiration date on the account.
Answer: D
Explanation: Disablement is a secure feature to employ on user accounts for temporary workers, interns, or consultants. It automatically disables a user account or causes the account to expire at a specific time and on a specific day.

NEW QUESTION: 3 開発者がRDPを使用してMicrosoft Azureロールに接続できることを確認する必要があります。あなたは何をすべきか？
A. 秘密鍵を使用して証明書をエクスポートします。
Azure管理ポータルのTranscodeWorkerRoleホストサービスの下の[証明書]セクションに.pfxファイルをアップロードします。
B. 秘密鍵なしで証明書をエクスポートします。
Azure管理ポータルのTranscodeWorkerRoleホストサービスの下の[証明書]セクションに.cerファイルをアップロードします。
C. 秘密鍵なしで証明書をエクスポートします。
Azure管理ポータル[管理証明書]セクションに.cerファイルをアップロードします。
D. 秘密鍵を使用して証明書をエクスポートします。
Azure管理ポータル[管理証明書]セクションに.pfxファイルをアップロードします。
Answer: A
Explanation: In case you don't want to use the RDP certificate created by Windows Azure Tools and want to use a custom certificate instead, the following steps will guide you. These steps can also be used in case package is not being published from Visual Studio rather it is being built locally, saved in either Local Machine's Drive or Windows Azure Blob Storage and subsequently published from there. Here are the steps which are required to get pass the publishing error which you might be running into. You would need to upload the Certificate

with Private Key to the portal (when Visual Studio is used this is done in the background). Detailed steps.1. In Visual Studio, go to the solution which is being developed.2. Right click the Web Project -> Configure Remote Desktop -> click on View to see Certificate details (Since I don't have a custom certificate I will use one create by Windows Azure Tools itself)3. Go to Details tab on Certificate -> Click Copy to file.. -> Next -> Select 'Yes, export the private key' -> Next -> Continue with default setting and create a password when asked (please refer below screenshots)4. These steps will generate a .PFX file for this certificate. Now we need to upload this certificate to the portal (for the respective cloud service)5. Go to the Azure Management Portal -> Go to the Cloud Service in question -> Certificates Tab -> Upload the newly created certificate (.PFX file) Note:* The certificates that you need for a remote desktop connection are different from the certificates that you use for other Azure operations. The remote access certificate must have a private key.* Microsoft Azure uses certificates in three ways:/ Management certificates - Stored at the subscription level, these certificates are used to enable the use of the SDK tools, the Windows Azure Tools for Microsoft Visual Studio, or the Service Management REST API Reference. These certificates are independent of any cloud service or deployment./ Service certificates - Stored at the cloud service level, these certificates are used by your deployed services./ SSH Keys - Stored on the Linux virtual machine, SSH keys are used to authenticate remote connections to the virtual machine.

NEW QUESTION: 4A. Option B. Option C. OptionD. Option Answer: A
