NEW QUESTION: 1A. Option DB. Option CC. Option FD. Option AE. Option BF. Option E
Answer: A,D,F

NEW QUESTION: 2As part of the application consultant team, you are responsible for Business Process Analysis. Select the most appropriate descriptions of Business Process Analysis as defined by the Sure Step Business Process Analysis Cross-Phase. Choose the 2 that apply.
A. Business Process Analysis begins with workshops designed to explore the current (as/is) processes. The future (to/be) processes are also documented as an output from these workshops. These workshops are finalized in the Analysis phase.
B. In the Design and Development phases, no Business Process Analysis activities are executed because these phases do not require further analysis.
C. Business Process Analysis begins with workshops that explore the current (as/is) processes. The future (to/be) processes are not covered in these workshops. These workshops are finalized in the Analysis phase.
D. In the Design and Development phases, the Business Process Analysis activities involve reviewing and updating the documented future (to/be) business process flows.
Answer: A,D

NEW QUESTION: 3Which of the following is a security risk regarding the use of public P2P as a method of collaboration?
A. Data integrity is susceptible to being compromised.
B. Users are not responsible for data usage tracking.
C. Monitoring data changes induces a higher cost.
D. Limiting the amount of necessary space for data storage.
Answer: A
Explanation: Peer-to-peer (P2P) networking is commonly used to share files such as movies and music, but you must not allow users to bring in devices and create their own little networks. All networking must be done through administrators and not on a P2P basis. Data integrity can easily be compromised when using public P2P networking.
Incorrect Answers: B. Data changes occur whether using P2P or any other type of networking where data files are concerned. C. Users are not responsible for this task, rather the security administrators are. D. Limiting storage space is not a security risk when making use of public P2P collaboration.
