NEW QUESTION: 2 A. Option B B. Option C C. Option D D. Option A
Answer: D
Explanation: Explanation The AWS Documentation mentions The optional Mappings section matches a key to a corresponding set of named values. For example, if you want to set values based on a region, you can create a mapping that uses the region name as a key and contains the values you want to specify for each specific region. You use the Fn::FindInMap intrinsic function to retrieve values in a map. For more information on mappings please refer to the below link:
