**E.** Check the license  
**Answer: C, E**  
**Explanation:** Reference: <https://www.paloaltonetworks.com/documentation/71/pan-os/pan-os/getting-started/enable-autofocus-threat-inte>

**NEW QUESTION: 2** Which of the following are components of Diego? (Choose all that apply)  
**A.** Cloud Controller  
**B.** Gorouter  
**C.** Doppler  
**D.** Bulletin Board System  
**E.** Garden  
**F.** Metron  
**G.** CC-Bridge  
**Answer: D, E, F**

**NEW QUESTION: 3** You are the security administrator for a large enterprise network with many remote locations. You have been given the assignment to deploy a Cisco IPS solution. Where in the network would be the best place to deploy Cisco IOS IPS?  
**A.** Outside the firewall of the corporate headquarters Internet connection  
**B.** At remote branch offices  
**C.** Inside the firewall of the corporate headquarters Internet connection  
**D.** At the entry point into the data center  
**Answer: B**  
**Explanation:** [http://www.cisco.com/en/US/prod/collateral/iosswrel/ps6537/ps6586/ps6634/product\\_data\\_sheet0900aecd803137cf.html](http://www.cisco.com/en/US/prod/collateral/iosswrel/ps6537/ps6586/ps6634/product_data_sheet0900aecd803137cf.html)  
Product Overview In today's business environment, network intruders and attackers can come from outside or inside the network. They can launch distributed denial-of-service attacks, they can attack Internet connections, and they can exploit network and host vulnerabilities. At the same time, Internet worms and viruses can spread across the world in a matter of minutes. There is often no time to wait for human intervention-the network itself must possess the intelligence to recognize and mitigate these attacks, threats, exploits, worms and viruses. Cisco IOS Intrusion Prevention System (IPS) is an inline, deep-packet inspection-based solution that enables Cisco IOS Software to effectively mitigate a wide range of network attacks. While it is common practice to defend against attacks by inspecting traffic at data centers and corporate headquarters, distributing the network level defense to stop malicious traffic close to its entry point at branch or telecommuter offices is also critical. Cisco IOS IPS: Major Use Cases and Key Benefits  
IOS IPS helps to protect your network in 5 ways:  
Key Benefits:  
\* Provides network-wide, distributed protection from many attacks, exploits, worms and viruses exploiting vulnerabilities in operating systems and applications.  
\* Eliminates the need for a standalone IPS device at branch and telecommuter offices as well as small and medium-sized business

networks.\* Unique, risk rating based signature event action processor dramatically improves the ease of management of IPS policies.\* Offers field-customizable worm and attack signature set and event actions.\* Offers inline inspection of traffic passing through any combination of router LAN and WAN interfaces in both directions.\* Works with Cisco IOS Firewall, control-plane policing, and other Cisco IOS Software security features to protect the router and networks behind the router.\* Supports more than 3700 signatures from the same signature database available for Cisco Intrusion Prevention System (IPS) appliances.
