The excellent CAS-004 learning questions are the product created by those professionals who have extensive experience of designing exam study material, CompTIA online test dumps can allow self-assessment test.

It covers nearly 96% real questions and answers, including the **Latest CAS-004 Exam Pdf** entire testing scope, Consider boosting up your career with this tested and also the most authentic exam passing formula.

NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com.You need to install and configure the Web Application Proxy role service.What should you do?**A.** Install the Active Directory Federation Services server role and the Remote Access server role on different servers.**B.** Install the Web Server (IIS) server role and the Application Server server role on different servers.**C.** Install the Web Server (IIS) server role and the Application Server server role on the same server.**D.** Install the Active Directory Federation Services server role and the Remote Access server role on the same server.**Answer: A**Explanation:AD FS is required to provide authentication and authorization services toWeb Application Proxy and to store the Web Application Proxy configuration.Remote Access is the role containing the Web Application Proxy role service.(<http://technet.microsoft.com/en-us/library/dn383650.aspx>)

NEW QUESTION: 2**A.** Option **A**. Option **D**. Option **B**. Option **C****Answer: B**

NEW QUESTION: 3Your network contains an on-premises Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD) as shown in the following two exhibits. You create a user named User1 in Active Directory as shown in the following exhibit.For each of the following statements, select Yes if the statement is true. Otherwise, select No.NOTE: Each correct selection is worth one point.**Answer:** Explanation:ExplanationThe Azure AD Attributes page shows which attributes will be synchronized based on the Office 365 services you are using (Exchange, SharePoint etc). We can see that ExtensionAttribute10 and ExtensionAttribute11 have been deselected.The Directory Extensions page shows which additional attributes will be synchronized (additional to the list in the Azure AD Attributes page).ExtensionAttribute1:Will be synchronized because it is ticked in the Azure AD Attributes page.ExtensionAttribute10.Will be synchronized because although it is unticked in the Azure AD Attributes page, it is added again in the Directory Extensions page.ExtensionAttribute11.Will not be synchronized because it is unticked in the Azure AD Attributes page and it is not added again in the Directory Extensions page.ExtensionAttribute12:Will be synchronized because it is ticked in the Azure AD Attributes page. It is also added again in the Directory Extensions page but this will have no effect as it is already ticked in the Azure AD Attributes page.Reference:

NEW QUESTION: 4An organization is planning to extend their data center by connecting their DC with the AWS VPC using the VPN gateway. The organization is setting up a dynamically routed VPN connection.Which of the below mentioned answers is not required to setup this

configuration?**A.** The type of customer gateway, such as Cisco ASA, Juniper J-Series, Juniper SSG, Yamaha.**B.** Elastic IP ranges that the organization wants to advertise over the VPN connection to the VPC.**C.** Border Gateway Protocol (BGP) Autonomous System Number (ASN) of the customer gateway.**D.** Internet-routable IP address (static) of the customer gateway's external interface.**Answer: B**
Explanation:ExplanationThe Amazon Virtual Private Cloud (Amazon VPC) allows the user to define a virtual networking environment in a private, isolated section of the Amazon Web Services (AWS) cloud. The user has complete control over the virtual networking environment. The organization wants to extend their network into the cloud and also directly access the internet from their AWS VPC. Thus, the organization should setup a Virtual Private Cloud (VPC) with a public subnet and a private subnet, and a virtual private gateway to enable communication with their data center network over an IPsec VPN tunnel. To setup this configuration the organization needs to use the Amazon VPC with a VPN connection. The organization network administrator must designate a physical appliance as a customer gateway and configure it. The organization would need the below mentioned information to setup this configuration:
The type of customer gateway, such as Cisco ASA, Juniper J-Series, Juniper SSG, Yamaha
Internet-routable IP address (static) of the customer gateway's external interface
Border Gateway Protocol (BGP) Autonomous System Number (ASN) of the customer gateway, if the organization is creating a dynamically routed VPN connection.
Internal network IP ranges that the user wants to advertise over the VPN connection to the VPC.
