NEW QUESTION: 1 You are setting up a local IPS package repository on your Oracle Solaris 11 server; solans example.com You want to point the existing local IPS publisher to the new local IPS repository located in /repo. These are the steps that you have followed: 1. Download and rsync the contents of the Oracle Solaris 11 repository ISO image to the /repo directory. 2. Configure the repository server service properties. The svcprop command displays the IPS-related properties: pkg/inst_root astng /repo pkg/readonly boolean true The ls command displays the contents of the /repo directory: #ls /repo pkg5 repository publisher The svcs command shows the svc:/application/pkg/server:default service is online. The pkg publisher command still displays: PUBLISHERTYPE STATUS URI solaris oriQinonline http://DkQ.Qracle.conVsolaris/release/ Which step needs to be performed to set the local IPS publisher to the local IPS repository /repo? **A.** issue the pkg set-publisher command to set the new repository location. **B.** issue the pkgrepo set command to set the new repository location. **C.** Restart the svc:/application/pkg/server:default service. **D.** issue the pkgrepo refresh -s command to refresh the repository. **E.** issue the pkgrepo rebuild command to rebuild the repository. **Answer: B**

NEW QUESTION: 2 You are working with your project team to control the project schedule. You will need five inputs to this process throughout your project. Which one of the following is an output of the project schedule control, and NOT an input? **A.** Project schedule **B.** Work performance information **C.** Work performance measurements **D.** Project management plan **Answer: C** Explanation: Work performance measurements are created from the work performance information. WPMs are an output of Control schedule, Control cost, and Control scope processes, which are monitoring and controlling processes. WPMs consist of planned versus actual performance indicators with respect to scope, schedule, and cost. They are documented and communicated to the stakeholders and are used to make project activity metrics, such as the following: Planned vs. Actual Technical performance and Scope performance Planned vs. Actual Schedule performance Planned vs. Actual Cost performance Answer option A is incorrect. Work performance information is an input to the control schedule process and includes information on project progress and activity start and finish information. Answer option C is incorrect. The project management plan is an input to the control schedule process. Answer option B is incorrect. The project schedule is an input to the control schedule process.
