NEW QUESTION: 1Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have an Exchange Server 2016 organization. Some users access the mailbox on their mobile device by using Exchange ActiveSync. You need to prevent the users from synchronizing more than one month of email or calendar data to their device. Solution: You deploy a mobile device mailbox policy. Does this meet the goal? **A. Yes B. No** **Answer: B** Explanation: Explanation/Reference: You can use mobile device mailbox policies to manage many different settings. These include the following: Require a password Specify the minimum password length Require a number or special character in the password Designate how long a device can be inactive before requiring the user to re-enter a password Wipe a device after a specific number of failed password attempts References: [https://technet.microsoft.com/en-us/library/bb123783\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/bb123783(v=exchg.160).aspx)

NEW QUESTION: 2 **A. Option D B. Option A C. Option C D. Option B** **Answer: A** Explanation: When implementing a custom membership provider, you are required to inherit the MembershipProvider abstract class. There are two primary reasons for creating a custom membership provider. You need to store membership information in a data source that is not supported by the membership providers included with the .NET Framework, such as a FoxPro database, an Oracle database, or other data source. You need to manage membership information using a database schema that is different from the database schema used by the providers that ship with the .NET Framework. A common example of this would be membership data that already exists in a SQL Server database for a company or Web site. Reference: MembershipProvider Class [https://msdn.microsoft.com/enus/library/system.web.security.membershipprovider\(v=vs.110\).aspx](https://msdn.microsoft.com/enus/library/system.web.security.membershipprovider(v=vs.110).aspx)

NEW QUESTION: 3 You administer desktop computers in your company network. You are

developing User State Migration Tool (USMT) procedures. You need to ensure that the files located in C:\projects are included in the migration package. What should you do? **A.** Option C **B.** Option A **C.** Option B **D.** Option D **Answer: A**
