Our advantages of time-saving and efficient can make you no longer be afraid of the AIF-C01 exam, and I'll tell you more about its benefits next.

NEW QUESTION: 1: 291Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have an Azure Cosmos DB database that contains a container named Container1. The partition key for Container1 is set to/day. Container1 contains the items shown in the following table.You need to programmatically query Azure Cosmos DB and retrieve item1 and item2 only.Solution: You run the following query.You set theEnableCrossPartitionQueryproperty toTrue.Does this meet the goal?**A. YesB. NoAnswer: A**

NEW QUESTION: 2During a review of IT service desk practices, an IS auditor notes that help desk personnel are spending more time fulfilling user requests (or password resets than resolving critical incidents. Which of the following recommendations to IT management would BEST address this situation?**A. Calculate the age of incident tickets and alert senior IT personnel when they exceed service level agreements (SLAs).B. Provide annual password management training to end users to reduce the number of instances requiring password resets.C. Incentivize service desk personnel to close incidents within agreed service levels.D. Implement a self-service solution and redirect users to access frequently requested services. Answer: D**

NEW QUESTION: 3The government uses CTI to provide up-to-the-minute election results. Which feature would probably NOT be part of such a system?**A. AudiotexB. Interactive voice responseC. Fax-on-demandD. Calling line IDAnswer: A**

NEW QUESTION: 4Which three statements about GET VPN are true? (Choose three.)**A. It uses a centralized key server for membership control.B. It can secure IP multicast, unicast, and broadcast group traffic.C. It enables the router to configure tunnels.D. It maintains full-mesh connectivity for IP networks.E. It encrypts WAN traffic to increase data security and provide transport authentication.F. It provides direct communication between sites, which reduces latency and jitter. Answer: A,E, F**Explanation:Cisco GET VPN Features and BenefitsFeature Description and Benefit Key ServicesKey Servers are responsible for ensuring that keys are granted to authenticated and authorized devices only. They maintain the freshness of the key material, pushing re-key messages as well as security policies on a regular basis. The chief

characteristics include: Key Servers can be located centrally, granting easy control over membership. Key Servers are not in the "line of fire" - encrypted application traffic flows directly between VPN end points without a bottleneck or an additional point of failure. Supports both local and global policies, applicable to all members in a group - such as "Permit any any", a policy to encrypt all traffic. Supports IP Multicast to distribute and manage keys, for improved efficiency; Unicast is also supported where IP Multicast is not possible. Scalability and Throughput The full mesh nature of the solution allows devices to communicate directly with each other, without requiring transport through a central hub; this minimizes extra encrypts and decrypts at the hub router; it also helps minimize latency and jitter. Efficient handling of IP Multicast traffic by using the core network for replication can boost effective throughput further. Security Provides data security and transport authentication, helping to meet security compliance and internal regulation by encrypting all WAN traffic.
