NEW QUESTION: 1 A security analyst has discovered that developers have installed browsers on all development servers in the company's cloud infrastructure and are using them to browse the Internet. Which of the following changes should the security analyst make to BEST protect the environment?
A. Create an alert that is triggered when a developer installs an application on a server
B. Create a security rule that blocks Internet access in the development VPC
C. Place a jumpbox in between the developers' workstations and the development VPC
D. Remove the administrator profile from the developer user group in identity and access management

Answer: B

NEW QUESTION: 2 A network technician at a company, Joe is working on a network device. He creates a rule to prevent users from connecting to a toy website during the holiday shopping season. This website is blacklisted and is known to have SQL injections and malware. Which of the following has been implemented?
A. Implicit Deny
B. Firewall rules
C. Mandatory access
D. Network separation

Answer: A

NEW QUESTION: 3 **A.** Option C **B.** Option B **C.** Option A **D.** Option D
Answer: A
Explanation:
Explanation A system admin can grant permission of the S3 objects or buckets to any user or make the objects public using the bucket policy and user policy. Both use the JSON-based access policy language. Generally, if the user is defining the ACL on the bucket, the objects in the bucket do not inherit it and vice versa. The bucket policy can be defined at the bucket level which allows the objects as well as the bucket to be public with a single policy applied to that bucket.

NEW QUESTION: 4 Brilliant Buys Local is a subsidiary of Brilliant Buys, and operates a number of smaller stores in local neighbourhoods. The managing director of Brilliant Buys Local, Mr Davidson, has been given a scatter diagram with sales of each store based on the size of the local population. Which of the following options outlines the best ways to interpret this diagram in this context? Select ALL that apply.
A. Use the diagram to interpret that the store with the lowest sales was in an area with a population of 5000
B. Use Pearson's coefficient to accurately draw a line of best fit
C. Draw a line of best fit by eye and estimate how much of a correlation there is between store sales and population
D. Use the diagram to interpret that two of the stores with the highest sales are in areas with a medium-sized population
E. Rearrange the data points on the scatter diagram so that it shows any correlation more clearly

Answer: B,C
