Getting a professional Snowflake certification with DEA-C01 test dumps is the first step beyond all questions, The main reason why we try our best to protect our customers' privacy is that we put a [Latest C1000-127 Exam Questions](#) high value on the reliable relationship and mutual reliance to create a sustainable business pattern.

NEW QUESTION: 1Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are a server administrator at a company named Contoso, Ltd. Contoso has a Windows Server 2016 Hyper-V environment configured as shown in the following table. All of the virtual switches are of the external type. You need to ensure that you can move virtual machines between the hosts without causing the virtual machines to disconnect from the network. Solution: You implement live migration by using Host1 and Host2. Does this meet the goal? **A. Yes B. No Answer: B**
Explanation: Explanation/Reference: Explanation:

NEW QUESTION: 2

ユーザーがOSPFを構成し、OSPFでギガビットイーサネットインターフェイスをアドバタイズしました。デフォルトでは、このインターフェイスはどのタイプのOSPFネットワークに属しますか? **A. broadcast B. nonbroadcast C. point-to-multipoint D. point-to-point Answer: D**

NEW QUESTION: 3Your company has a main office and two branch offices. The main office is located in Seattle. The two branch offices are located in Montreal and Miami. Each office is configured as an Active Directory site. The network contains an Active Directory domain named contoso.com. Network traffic is not routed between the Montreal office and the Miami office. You implement a Distributed File System (DFS) namespace named \contoso.compublic. The namespace contains a folder named Folder1. Folder1 has a folder target in each office. You need to configure DFS to ensure that users in the branch offices only receive referrals to the target in their respective office or to the target in the main office. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) **A. Set the Ordering method of \contoso.compublic to Lowest cost. B. Set the Advanced properties of the folder target in the Seattle office to Last among all targets. C. Set the Advanced properties of the folder target in the Seattle office to Last among targets of equal cost. D. Set the Advanced properties of the folder target in the Seattle office to First among targets of equal cost. E. Set the Ordering method of \contoso.compublic to Exclude targets outside of the client's site. F. Set the Ordering method of \contoso.compublic to Random order. Answer: D, E**
Explanation: Explanation: Exclude targets outside of the client's site In this method, the referral contains only the targets that are in the same site as the client. These same-site targets are listed in random order. If no same-site targets exist, the client does not receive a referral and cannot access that portion of the namespace. Note: Targets that have target priority set to "First among all targets" or "Last among all targets" are still listed in the referral, even if the ordering method is set to Exclude targets outside of the client's site. Note 2: Set the Ordering Method for Targets in Referrals A referral is an ordered list of targets that a client

computer receives from a domain controller or namespace server when the user accesses a namespace root or folder with targets. After the client receives the referral, the client attempts to access the first target in the list. If the target is not available, the client attempts to access the next target.

NEW QUESTION: 4 Which of the following is the impact of changing the NE ID of OSN 3500 on the NMS? **A.** Services are interrupted. **B.** NE communication is interrupted. **C.** The device is restarted. **D.** The NE time is not synchronized. **Answer: B**
