And this version of our AWS-Certified-Database-Specialty training guide is convenient for you if you are busy at work and traffic.

**NEW QUESTION: 1** You have an Azure subscription that is used by four departments in your company. The subscription contains 10 resource groups. Each department uses resources in several resource groups. You need to send a report to the finance department. The report must detail the costs for each department. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation: ExplanationBox 1: Assign a tag to each resource. You apply tags to your Azure resources giving metadata to logically organize them into a taxonomy. After you apply tags, you can retrieve all the resources in your subscription with that tag name and value. Each resource or resource group can have a maximum of 15 tag name/value pairs. Tags applied to the resource group are not inherited by the resources in that resource group.Box 2: From the Cost analysis blade, filter the view by tag After you get your services running, regularly check how much they're costing you. You can see the current spend and burn rate in Azure portal.\* Visit the Subscriptions blade in Azure portal and select a subscription.\* You should see the cost breakdown and burn rate in the popup blade.\* Click Cost analysis in the list to the left to see the cost breakdown by resource. Wait 24 hours after you add a service for the data to populate.\* You can filter by different properties like tags, resource group, and timespan. Click Apply to confirm the filters and Download if you want to export the view to a Comma-Separated Values (.csv) file.Box 3: Download the usage reportReferences: <https://docs.microsoft.com/en-us/azure/azure-resource-manager/resource-group-using-tags> <https://docs.microsoft.com/en-us/azure/billing/billing-getting-started>

**NEW QUESTION: 2** Which of the following classes is defined in the TCSEC (Orange Book) as discretionary protection? **A. CB. AC. BD. D****Answer: A** Explanation: Explanation/Reference: Explanation: The U.S. Department of Defense developed the Trusted Computer System Evaluation Criteria (TCSEC), which was used to evaluate operating systems, applications, and

different products. These evaluation criteria are published in a book known as the Orange Book. TCSEC provides a classification system that is divided into hierarchical divisions of assurance levels: A. Verified protection B. Mandatory protection C. Discretionary protection D. Minimal protection Classification A represents the highest level of assurance, and D represents the lowest level of assurance. Level C: Discretionary Protection: The C rating category has two individual assurance ratings within it. The higher the number of the assurance rating, the greater the protection. Incorrect Answers: B: Level B is defined as mandatory protection, not discretionary protection. C: Level A is defined as verified protection, not discretionary protection. D: Level D is defined as minimal security, not discretionary protection. References: Harris, Shon, All In One CISSP Exam Guide, 6th Edition, McGraw-Hill, New York, 2013, pp. 392, 394

**NEW QUESTION: 3** Your company network includes Forefront Identity Manager (FIM) 2010. You are performing the migration of FIM from the test environment to the production environment. After you run the CommitChanges.ps1 PowerShell script, the count of UndoneImports is a non-zero value. You need to find out why the UndoneImports count does not return zero. What should you do? **A.** Review the undone.xml file. **B.** Review the Application log for FIM in the Event Log Viewer. **C.** Review the changes.xml file. **D.** Run the ResumeUndoneImports.ps1 PowerShell script. **Answer: A**
