We offer you a wide range of study guides, braindumps and **CFA-001 Test Question** practice exams on the career-oriented IT certifications and help you pass exams without facing any difficulty.

So that you can know the high reliability of our Estruturit, CFA-001 practice exam will provide you with wholehearted service throughout your entire learning process.

Within one year, we will send the latest version to your mailbox with no charge if we have a new version of CFA-001 learning materials.

NEW QUESTION: 1204 You are a database developer and you have about two years experience in creating business Intelligence (BI) by using SQL Server2008.Now you are employed in a company named NaproStar which uses SQL Server2008. You work as the technical support. According to the requirement of the company, you're deploying a SQL Server 2008 Integration Services (SSIS) package.The XML configuration is not specified when deploying the package. You have to apply the configuration to the deployed package. What action should you do?**A.** The DTEXEC command line utility should be used**B.** The DTUTIL command line utility should be used**C.** The Deployment utility should be used**D.** The SETX command line utility should be used
Answer: A
Explanation:Using DTExecUI to Configure Package Execution The command-line executable file DTExec is a fully featured utility with broad parameterization capabilities. You can generate the command line manually by applying the command parameters to meet the execution circumstance, but to save time and avoid errors, you can use the command-line builder utility named DTExecUI. DTExecUI is a visual tool that naturally groups the command parameter options. The server on which you run DTExecUI must have SSIS installed. To open DTExecUI, type DTExecUI either from a command prompt or by choosing Start and then Run to open the Run dialog box. You can open the tool from the Run dialog box or from the command prompt without specifying the path. To use DTExecUI, follow these steps:1.Open the Execute Package Utility by executing DTExecUI either by choosing Start and then Run, and entering DTExecUI in the Run dialog box, or through a command prompt.2.On the General property page, select the package for execution so that you can modify a property on the other pages. In the Package Source drop-down list, select File System, SSIS Package Store, or SQL Server, depending on where your package is located.3.After identifying the package location, select the specific package for execution. If your package is stored in205 SQL Server or the SSIS Package Store, you need to specify the connection details to the SQL Server 2008 server by providing the server name. SQL Server also requires you to either provide a user name and password or specify Windows Authentication. All location choices require that you specify the package in the Package box by clicking the ellipsis button to the right of the Package box.4. Next you need to specify how the package should be executed by configuring other package execution

properties. Selecting the various property pages on the left from Configurations down through Verification will let you override settings such as connections, logging, and outputs. Table 4-3 describes the execution configuration options. Manual package deployment You can move your SSIS packages to a destination folder by copying them manually, by using a source-control tool that handles file deployment, or by creating a script or an application that handles the deployment. If you store your package in SQL Server, you can either use the DTUtil command-line utility that comes with SSIS to deploy your packages to SQL Server or manually import them through SSMS.

NEW QUESTION: 2

クライアントとホスト間の安全な接続を作成するために使用されるのは次のうちどれですか？**A.** VLAN**B.** IISサーバー**C.** VPN**D.** プロキシサーバー**Answer: C**

NEW QUESTION: 3 SAP NetWeaver Process Orchestration combines PI with which of the following? There are 2 correct answers to this question. Choose:**A.** NW Business Change Management (BCM)**B.** NW Business Process Management (BPM)**C.** NW Business Data Management (BDM)**D.** NW Business Rules Management (BRM)**Answer: B,D**
