We not only provide high pass-ratio Service-Cloud-Consultant torrent PDF but also spear no effort to protect your purchase process from any danger and concern.

NEW QUESTION: 1What is the purpose of Inverse ARP?
A. to map a known IP address to a MAC address
B. to map a known MAC address to an IP address
C. to map a known DLCI to an IP address
D. to map a known SPID to a MAC address
E. to map a known DLCI to a MAC address
F. to map a known IP address to a SPID
Answer: C
Explanation:Dynamic address mapping relies on the Frame Relay Inverse Address Resolution Protocol (Inverse ARP), defined by RFC 1293, to resolve a next hop network protocol (IP) address to a local DLCI value. The Frame Relay router sends out Inverse ARP requests on its Frame Relay PVC to discover the protocol address of the remote device connected to the Frame Relay network. The responses to the Inverse ARP requests are used to populate an address-to-DLCI mapping table on the Frame Relay router or access server. The router builds and maintains this address-to-DLCI mapping table, which contains all resolved Inverse ARP requests, including both dynamic and static mapping entries.

NEW QUESTION: 2DRAG DROP
Answer: Explanation:

NEW QUESTION: 3Which three best practices should be performed for a Data-Only Survey? (Choose three.)
A. disable DTPC
