You can completely trust our learning materials.

NEW QUESTION: 1You need to meet the connection requirements for the New York office.What should you do? To answer, select the appropriate options in the answer area.**NOTE:** Each correct selection is worth one point.**Answer:** Explanation:Explanation:Box 1: Create a virtual network gateway and a local network gateway.Azure VPN gateway. The VPN gateway service enables you to connect the VNet to the on-premises network through a VPN appliance. For more information, see Connect an on-premises network to a Microsoft Azure virtual network. The VPN gateway includes the following elements:* Virtual network gateway. A resource that provides a virtual VPN appliance for the VNet. It is responsible for routing traffic from the on-premises network to the VNet.* Local network gateway. An abstraction of the on-premises VPN appliance. Network traffic from the cloud application to the on-premises network is routed through this gateway.* Connection. The connection has properties that specify the connection type (IPSec) and the key shared with the on-premises VPN appliance to encrypt traffic.* Gateway subnet. The virtual network gateway is held in its own subnet, which is subject to various requirements, described in the Recommendations section below.Box 2: Configure a site-to-site VPN connectionOn premises create a site-to-site connection for the virtual network gateway and the local network gateway.Scenario: Connect the New York office to VNet1 over the Internet by using an encrypted connection.Incorrect Answers:Azure ExpressRoute: Established between your network and Azure, through an ExpressRoute partner. This connection is private. Traffic does not go over the internet.References:<https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/hybrid-networking/vpn>
