The TippingPoint Virtual Controller (vController) and Virtual IPS (vIPS) solutions are purpose-built to secure the virtual infrastructure, and enable organizations to gain visibility and control of virtual network traffic flows. They allow for the enforcement of trust zones and network segmentation with IPS and virtual firewall. TippingPoint solutions perform in-line inspection and automated threat blocking within the virtual servers and between trust zones. They provide the same policies and filters across both physical and virtual servers to simplify overall security management for the
