NEW QUESTION: 4

国際業務のコンプライアンスの観点から組織が直面する深刻な問題は何ですか？ **A.** 異なる機能 **B.** 異なる操作手順 **C.** 異なる認定 **D.** 複数の管轄区域 **Answer: D** Explanation: When operating within a global framework, a security professional runs into a multitude of jurisdictions and requirements, which often may not be clearly applicable or may be in contention with each other. These requirements can involve the location of the users and the type of data they enter into systems, the laws governing the organization that owns the application and any regulatory requirements they may have, and finally the appropriate laws and regulations for the jurisdiction housing the IT resources and where the data is actually stored, which may be multiple jurisdictions as well. Different certifications would not come into play as a challenge because the major IT and data center certifications are international and would apply to any cloud provider. Different capabilities and different operational procedures would be mitigated

by the organization's selection of a cloud provider and would not be a challenge if an appropriate provider was chosen, regardless of location.
