Our experts refer to the popular trend among the industry and the real exam papers and they research and produce the detailed information about the H11-851_V4.0 study materials.

NEW QUESTION: 1Which two statements are true about AAA? (Choose two.)**A.** AAA can be used to authenticate the enable password with a AAA server.**B.** If the local keyword is not included and the AAA server does not respond, then authorization will never be possible and the connection will fail.**C.** AAA can use RADIUS, TACACS+, or Windows AD to authenticate users.**D.** If RADIUS is the only method configured in AAA, and the server becomes unreachable, the user will be able to log in to the router using a local username and password.**Answer: A,B**

Explanation:AAA can be used to authenticate user login and the enable passwords.Example 1: Same Exec Authentication Methods for All UsersOnce authenticated with:aaa authentication login default group radius localAll users who want to log in to the access server have to be authorized using Radius (first method)or local database (second method).We configure:aaa authorization exec default group radius localNote. On the AAA server, Service-Type=1 (login) must be selected.Note. With this example, if the local keyword is not included and the AAA server does not respond,then authorization will never be possible and the connection will fail.
