NEW QUESTION: 2A. Option CB. Option DC. Option BD. Option AAnswer: DExplanation: ExplanationThe payroll system is not meeting security policy due to missing OS security patches. We cannot apply the patches to the system because the vendor states that the system is only supported on the current OS patch level. Therefore, we need another way of securing the system.We can improve the security of the system and the other systems on the network by isolating the payroll system on a secure network to limit its contact with other systems. This will reduce the likelihood of a malicious user accessing the payroll system and limit any damage to other systems if the payroll system is attacked.

NEW QUESTION: 3What is a script used for?**A.** It is the code used for finding the result in the uCMDB**B.** It is a part of the pattern and contains the connection code to connect to infrastructure resources and request information**C.** It is used for the TQL command lines**D.** It is used for the TQL for triggered list**Answer: B**

NEW QUESTION: 4DRAG DROPYou need to plan the subnets for Call Admission Control (CAC) and media bypass.Which subnet or subnets should you use for each office?To answer, drag the appropriate subnet or subnets to the correct office in the answer area. Each subnet may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:
