So the online version of the 102-500 study materials from our company will be very useful for you to prepare for your exam, You will always have access to the latest questions with our Web / Mobile Simulator.

We have built our own reputation in the market, The 102-500 exam material we provide is compiled by experts and approved by the professionals who boost profound experiences.

The technology you get today may be out of date tomorrow.

**NEW QUESTION: 1** Which of the following types of network topologies are supported by IS-IS on the Nokia 7750 SR? Choose two answers. **A.** Point-to-point **B.** Point-to-multipoint **C.** Non-broadcast **D.** Broadcast **Answer: A,D**

**NEW QUESTION: 2** During stage 3, the project scope was extended to include a practice test for learners to take during the training course. The cost of this test will be included in the cost of the course. The change to project scope was approved and the cost of £2,500 was paid for from the change budget. The project manager documented an increase of £2,500 in the project budget in the business case. Is this an appropriate action, and why? **A.** No, because the use of the change budget means that the project budget does not need to be increased. **B.** Yes, because the justification for the project should be recalculated based on the revised project budget. **C.** No, because changes to operational costs post-project should have been included in the business case. **D.** Yes, because the project manager determines which costs need to be updated at the end of each stage **Answer: D**

**NEW QUESTION: 3** A customer has an IBM DS8884 volume with a 4% change rate per day and wants to copy changes to tape once a day. Which function is the best solution? **A.** IBM z/OS Distributed Data Backup **B.** Incremental FlashCopy **C.** Remote Mirror and Copy **D.** Remote Pair FlashCopy **Answer: C**

**NEW QUESTION: 4** Which disaster recovery scenario offers the lowest probability of down time? **A.** Pilot light **B.** Backup and restore **C.** Warm standby **D.** Multi-site active-active **Answer: D**  
Explanation: Backup and Restore: a simple, straightforward, cost-effective method that backs up and restores data as needed. Keep in mind that because none of your data is on standby, this method, while cheap, can be quite time-consuming. Pilot Light: This method keeps critical applications and data at the ready so that it can be quickly retrieved if needed. Warm Standby: This method keeps a duplicate version of your business' core elements running on standby at all times, which makes for a little downtime and an almost seamless transition. Multi-Site Solution: Also known as a Hot Standby, this method fully replicates your company's data/applications between two or more active locations and splits your traffic/usage between them. If a disaster strikes, everything is simply rerouted to the unaffected area, which means you'll suffer almost zero downtime. However, by running two separate environments simultaneously, you will obviously incur much higher costs.
