Explanation/Reference: Explanation:

NEW QUESTION: 3 DRAG DROP You are developing an application that implements a set of custom exception types. You declare the custom exception types by using the following code segments: The application includes a function named DoWork that throws .NET Framework exceptions and custom exceptions. The application contains only the following logging methods: The application must meet the following requirements: - When AdventureWorksValidationException exceptions are caught, log the information by using the static void Log(AdventureWorksValidationException ex) method. - When AdventureWorksDbException or other AdventureWorksException exceptions are caught, log

the information by using the static void I oq(AdventureWorksException ex) method.You need to meet the requirements.How should you complete the relevant code? (To answer, drag the appropriate code segments to the correct locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)**Answer:** Explanation:
