NEW QUESTION: 1CORRECT TEXT Fill in the blank. To verify that a VPN Tunnel is properly established, use the command _____**Answer:** Explanation:vpn tunnelutil

NEW QUESTION: 2You are deploying Dynamics CRM 2015.You plan to use smart matching and tracking tokens.What information in email messages do tracking tokens rely on to identify items that should be tracked?**A.** An alphanumeric string generated at the beginning of the subject line**B.** A token that contains an alphanumeric string that is located in the email header**C.** The email address of the sender and the recipient**D.** An alphanumeric string generated at the end of the subject line**Answer: D**Explanation:How Microsoft Dynamics CRM uses tracking tokens Tracking tokens increase the probability for email identification and matching. You can use the tracking token feature to improve email message tracking. A tracking token is an alphanumeric string generated by Microsoft Dynamics CRM and appended to the end of an email subject line. It matches email activities with email messages.

NEW QUESTION: 3A user has created a VPC with CIDR 20.0.0.0/16 using VPC Wizard. The user has created a public CIDR(20.0.0.0/24) and a VPN only subnet CIDR (20.0.1.0/24) along with the hardware VPN access to connect to the user's data centre. Which of the below mentioned components is not present when the VPC is setup with the wizard?**A.** A NAT instance configured to allow the VPN subnet instances to connect with the internet**B.** Custom route table attached with a public subnet**C.** An internet gateway for a public subnet**D.** Main route table attached with a VPN only subnet**Answer: A**Explanation:The user can create subnets as per the requirement within a VPC. If the user wants to connect VPC from his own data centre, he can setup a public and VPN only subnet which uses hardware VPN access to connect with his data centre. When the user has configured this setup with Wizard, it will update the main route table used with the VPN-only subnet, create a custom route table and associate it with the public subnet. It also creates an internet gateway for the public subnet. The wizard does not create a NAT instance by default. The user can create it manually and attach it with a VPN only subnet.
