NEW QUESTION: 1An application serializes and deserializes XML from streams. The XML streams are in the following format:The application reads the XML streams by using aDataContractSerializer object that is declared by the following code segment:Which attributes should you include in Target 1, Target 2 and Target 3 to complete the code? (To answer, drag the appropriate attributes to the correct targets in the answer area. Each attribute may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)**Answer:** Explanation:Explanation

NEW QUESTION: 2Although the STP protocol can solve the loop problem, the slow convergence of the network topology affects the user communication quality.RSTP has made many improvements to STP. Which of the following is not an improvement of RSTP to STP?**A.** If a port does not receive configuration BPDUs from the upstream device within 4 consecutive Hello Time durations, the device considers that negotiation with this neighbor fails.**B.** The RSTP port state specification is based on whether the port forwards user traffic and learns the MAC address, reducing the original five port states to three.**C.** The non-root switch running RSTP sends configuration BPDUs at the interval specified by the Hello Timer. This behavior is completely performed by each device.**D.** RSTP has deleted 3 kinds of port states and added 2 kinds of port roles.**Answer: A**

NEW QUESTION: 3You need to retrieve the required performance counters.What should you do?**A.** Option B**B.** Option A**C.** Option C**D.** Option D**Answer: A**Explanation:Explanation/Reference:Testlet 1BackgroundContoso Ltd. is a global real estate company. You are hired to replace the company's existing ASP.NET website at http://www.contoso.com with a new SharePoint 2013 public-facing website. The site will display data about the company and information about residential properties that the individual agents in the company are selling. You have SharePoint Server environments for development, staging, and production.Search The website has the following requirements:Site visitors must be able to search for documents that are located anywhere on the site.When site visitors search for real estate properties, they must see information about a property.When a visitor searches for the word Guidelines, a PDF document named Real Estate Guidelines must appear at the top of the search results.Search Engine OptimizationThe company wants to ensure that the website displays prominently in Internet search results when people search for real estate.The website has the following requirements:Internet search engines must properly rank pages so that the more popular pages on the site appear first in the Internet search engine results.SharePoint must generate the sitemap.xml and robots.txt files that are used by Internet search engines.When an Internet search engine crawls the site, the search engine must recognize that the following URLs display information about different agents:
http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId = Sacramento
http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId = HoustonThe search

engine must recognize that the following URLs display the same information about the same agent:
<http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId=Sacramento>
<http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId=Sacramento&icerts=true>

Managed Metadata Service (MMS)
The MMS must include three term sets named Offices, Cities, and Features.

Offices Term Set
The Offices term set has the following requirements:
The Offices term set must be a child of the group named Navigation.
The Offices term set must be configured to use friendly URLs in the Offices sub-site.
The name for each new office must be added to the Offices term set programmatically.
The left navigation pane for the Offices page on the website must use the terms in the Offices term set.
When the company opens a new office, a link for each new office must display in the left navigation pane.

Cities Term Set
The Cities term set has the following requirements:
The Cities term set must contain a list that contains the names of major metropolitan areas.
Many of the cities that are included in the Offices term set may also appear in the Cities term set, but the term sets may not be identical.
If a city is required in both term sets, it must first be added to the Offices term set before it can be added to the Cities term set.
If a term is changed in the Offices term set, it must automatically change in the Cities term set.
The term Dallas must have a term ID of {b6ell481-3445-413c-9da0-bl5ae5d5cbd4}.

Features Term Set
You have an Excel file that contains a list of possible features for each property. The Features term set has the following requirements:
The Features term set must contain the terms that describe details about each property, such as whether the building is a single family house or a condominium.
The list of possible features must be programmatically imported from the Excel file into the term store in each server environment.

Web Application
The Internet Information Services (IIS) website contains a folder named `_ConfigurationFiles`. The web application has the following requirements:
Anonymous access must be enabled on the web application.
Internet search engines must index the site.
Internet search engines must not index the files in the `_ConfigurationFiles` folder.

Site Collections and Content
The web application includes the following three site collections.

Board Member Site Collection
The Board Member site collection is only accessible to the board members so that they can view private company information. The Board Member site collection has the following requirements:
Only board members can log in to the site collection.
A page within the site collection must display a list of all the board members.
The website must be located at <http://www.contoso.com/sites/board>.

Internet Site Collection
Anonymous access is enabled on the Internet site collection. The Internet site collection has the following requirements:
The site collection must include a sub-site named Offices.
The URL of the Offices sub-site is <http://www.contoso.com/Offices>.
Each office must have its own page on the site.
The pages for each office must have the same style and structure.
Each office page must contain a Content Search Web Part that displays a listing of all the properties that are being sold by agents in the office.
The Content Search Web Part must use a custom display template named Real Estate Property to render search results when site visitors search for a property.
The target page for terms in the Office term set must point to a page named `Office.aspx` that is in the Pages library of the Offices sub-site.
The site must contain an About Us section that contains a Content Search Web Part that lists the members of the board of directors for the company.
Each member of the board must have a page that contains biographical information about that board member.
The list of board members must be available in the Board Member site collection.
Site visitors must be able to view information about individual agents, including their contact information, certifications, and picture.
When agents visit the Internet site collection, the agents may add information about each of the real estate properties that they are selling.
The agents must be able to tag real estate properties according to their features.
Real estate agents must enter real estate property information into a web form that is used specifically for data collection.
The web form must collect the following information:
The property address.
Up to five pictures of the property.
The selling price.
The number of bedrooms and bathrooms.
The name of the real estate agent.
Tags that will further describe the property.

Agent Site Collection
The Agent site collection is in the same web application and is accessible only to agents. The Agent site collection has the following

requirements: The site collection must include a site that contains instructions for real estate agents that tells them how to add property information to the website. The website must be located at <http://www.contoso.com/sites/agents>. A Web Part must use the .NET client-side object model (CSOM) to retrieve all of the terms from only the Features term set. Page Layouts and Web Parts Page Layouts You must create the following page layouts: About Us, Biography With Image, Biography No Image, and Office. The page layouts have the following requirements: The About Us page layout must include a field to which the user may add Web Parts. The Biography With Image and Biography No Image page layouts must display biographical information about the board of directors. You must create a content type named Biography. Biography With Image and Biography No Image page layouts must use the Biography content type. The Office page layout must display information for each office and must use the fields that are defined in the Elements.xml file. Web Parts The Agent Web Part has the following requirements: The Web Part must display information about an individual agent. The Web Part must display information that is based on query string parameters. The URL of the page that hosts the Web Part must be <http://www.contoso.com/FindAnAgent>. The following table lists the query string parameters and the way that each parameter must be used by the Web Part. Application Structure Relevant portions of the markup and code for the solution are shown below. (Line numbers in the code segments are included for reference only and include a two-character prefix that denotes the specific file to which they belong.) Elements.xml Features TermSet.esl Import.cs

NEW QUESTION: 4 You have been hired as an Accounts Auditor for ABC.com. The Accounts Manager has given you a workbook that he created using Microsoft Office Excel 2010. The workbook has multiple worksheets and contains several formulas. You select a cell in a worksheet. How can you view which formulas refer to the cell? **A.** You should consider navigating to the Formulas tab and selecting the Lookup and Reference option. **B.** You should consider navigating to the Formulas tab and selecting the Trace Precedents option. **C.** You should consider navigating to the Formulas tab and selecting the Evaluate Formula option. **D.** You should consider navigating to the Formulas tab and selecting the Trace Dependents option. **Answer: D**
