A little practice can perfect you to answer all HQT-4420 new questions in the real exam scenario.

NEW QUESTION: 1 A company hosts a website and exposes web services on the company intranet. The intranet is secured by using a firewall. Company policies prohibit changes to firewall rules. Devices outside the firewall must be able to access the web services. You need to recommend an approach to enable inbound communication. What should you recommend?
A. Windows Azure Pack
B. The Azure Service Bus
C. A web service in an Azure role that relays data to the internal web services
D. The Azure Access Control Service
Answer: B
Explanation: The Service Bus Relay is designed for the use-case of taking existing Windows Communication Foundation (WCF) web services and making those services securely accessible to solutions that reside outside the corporate perimeter without requiring intrusive changes to the corporate network infrastructure. Such Service Bus relay services are still hosted inside their existing environment, but they delegate listening for incoming sessions and requests to the cloud-hosted Service Bus.
