Click OK. * (Step 2) Specify target variation sites * (step 3) Content deployment Content deployment copies content from a source site collection to a destination site collection. We recommend that you disable any content deployment jobs that include the source variation site while Variations Create Hierarchies Job

Definition runs.* From scenario:The website must support English (United States), Spanish (Mexico), and German (Germany). All content is authored in English and then translated into Spanish and German by an outside vendor. Translations are performed by humans.* The variations feature in SharePoint Server 2013 and SharePoint Online makes content available to specific audiences on different sites by syncing content from a source variation site to each target variation site. Content on a target variation site can be translated into other languages before it is published. Variations can be used only on sites that are created by using one of the Publishing site templates, or on a site for which the SharePoint Server Publishing Infrastructure feature was activated.Reference: Step by Step: Setup multi language support in SharePoint 2010Reference: Plan for variations in SharePoint Server 2013
