After your download online, you can use on [C\\_ARP2P\\_2404 New Exam Braindumps](#) offline anywhere, But even you fail the exam, we assure we will give you FULL REFUND.

**NEW QUESTION: 1A. 0B. 1C. 2D. 3Answer: D**Explanation:Elastic Load Balancing provides a special Amazon EC2 source security group that the user can use to ensure that back-end EC2 instances receive traffic only from Elastic Load Balancing. This feature needs two security groups: the source security group and a security group that defines the ingress rules for the back-end instances. To ensure that traffic only flows between the load balancer and the back-end instances, the user can add or modify a rule to the back-end security group which can limit the ingress traffic. Thus, it can come only from the source security group provided by Elastic load Balancing.

**NEW QUESTION: 2**Which two statements are true about local host traffic on an SRX Series device? (Choose two.)**A.** Outbound traffic sourced from an SRX Series device is always allowed by default.**B.** Routing protocol host inbound traffic is allowed by default.**C.** Outbound traffic sourced from an SRX Series device must be configured under a zone or interface.**D.** Routing protocol host inbound traffic is not allowed by default.**Answer: A,D**
