NEW QUESTION: 1システム管理者の要望-機会段階が変更されると、金額フィールドが増加します
A. アカウントの積み上げ集計を使用する**B.** 機会にワークフローフィールドの更新を作成する**C.** クロスオブジェクト式を使用**D.** アカウントでワークフローフィールドの更新を作成します
Answer: B

NEW QUESTION: 2Which network topology allows all traffic to flow through a central hub?
A. star**B.** mesh**C.** ring**D.** bus
Answer: A
Explanation:Explanation/Reference:Explanation:Star topology is the arrangement of the computers in such a way that all the terminals or work stations are connected to the main central hub. The terminals are referred to as the clients and the main central hub is referred to as the switch. It is the easiest way of arranging a network topology with one central main computer connected to several other functioning terminals. All the network traffic passes through the central device and all the data transmission occurs through the main switch as well as all the hub acts as the signal repeater. One advantage of such an arrangement is the simplicity and the ease with which you can add additional nodes. The disadvantage is that if an error occurs in the central hub the whole network shuts down.
