NEW QUESTION: 4A network administrator has purchased two devices that will act as failovers for each other. Which of the following concepts does this BEST illustrate?**A.** Confidentiality**B.** Availability**C.** Integrity**D.** Authentication**Answer: B**
Explanation:Explanation/Reference:
Explanation:Failover refers to the process of reconstructing a system or switching over to other systems when a failure is detected. In the case of a server, the server switches to a redundant server when a fault is detected. This strategy allows service to continue uninterrupted until the primary server can be restored. In the case of a network, this means processing switches to another network path in the event of a network failure in the primary path. This means availability.
