NEW QUESTION: 1 Consider the following skills assessment spreadsheet for your test team (consisting of four team members): This spreadsheet has three sections: technical expertise, testing skills and professionalism. The skill levels for each skill area for both the "technical expertise" and "testing skills" sections have been rated on a four-point scale: - E (Expert): indicates that a person has expert knowledge and experience in the skill area - B (Beginner): indicates that a person has some knowledge and experience in the skill area but he/she is not autonomous - W (Wants to learn): indicates that a person has no knowledge or experience in the skill area but he/she wants to learn that skill - NI (Not Interested): indicates that a person has no knowledge or experience in the skill area and he/she is not interested to learn that skill The skill levels for each skill area of the "professionalism" section have been rated on a three point scale (H=High, M=Medium, L=Low). You are using this skills assessment spreadsheet in order to define a training development plan for your test team. Your objective is to fill the skill gaps by having at least a team member rated as an expert for each skill identified for the "technical expertise" and "testing skills" sections, and with the ability to train the other team members. Considering the budget constraints you can send only one person to a training course. Based only on the given information, which of the following answers would you expect to be the best option to achieve your objective? K4 3 credits **A.** Send John to a performance testing training course **B.** Send Mark to a test automation training course **C.** Send Alex to a performance testing training course **D.** Send Robert to a performance testing training course **Answer: C**

NEW QUESTION: 2 Which of the following media is MOST resistant to EMI interference? **A.** twisted pair **B.** microwave **C.** coaxial cable **D.** fiber optic **Answer: D** Explanation: A fiber optic cable is a physical medium that is capable of conducting modulated light transmission. Fiber optic cable carries signals as light waves, thus creating higher transmission speeds and greater distances due to less attenuation. This type of cabling is more difficult to tap than other cabling and is most resistant to interference, especially EMI.
