NEW QUESTION: 1Which of the following situations would be the MOST concern to a security manager?**A.** The logon ID for a terminated systems analyst still exists on the system**B.** Audit logs are not enabled on a production server**C.** A Trojan was found to be installed on a system administrator's laptop**D.** The help desk has received numerous results of users receiving phishing e-mails**Answer: C****Explanation:**The discovery of a Trojan installed on a system's administrator's laptop is highly significant since this may mean that privileged user accounts and passwords may have been compromised. The other choices, although important, do not pose as immediate or as critical a threat.

NEW QUESTION: 2A technician is tasked with installing a legacy applicaton on a Windows 7 computer. When the technician tries toinstall the legacy applicaton, an error is received that the applicaton cannot be installed because the OS is notsupported. Which of the following should the technician do FIRST to try to get the applicaton installed in Windows 7?**A.** Install Windows Security updates on the system**B.** Install the latest Windows service packs and updates**C.** Install the applicaton in safe mode**D.** Install the applicaton with compatibility mode**Answer: D**

NEW QUESTION: 3Which of the following is a cause of model risk in risk management?**A.** Misspecification of the model**B.** Incorrect parameter estimation**C.** All of the above**D.** Programming errors**Answer: C****Explanation:**ExplanationModel risk is the risk that a model built for estimating a variable will produce erroneous estimates. Model risk is caused by a number of factors, including:a) Misspecifying the model: For example, using a normal distribution when it is not justified.b) Model misuse: For example, using a model built to estimate bond prices to estimate equity prices c) Parameter estimation errors: In particular, parameters that are subjectively determined can be subject to significant parameter estimation errors d) Programming errors: Errors in coding the model as part of computer implementation may not be detected by end users e) Data errors: Errors in data used for building the model may also introduce model risk Therefore the correct answer is d, as all the choices are a source of model risk.
