Invoice When you need the invoice, please email us the name of Latest D-PST-OE-23 Practice Questions your company, The clients can consult our online customer service before and after they buy our Dell PowerStore Operate 2023 Exam guide dump.

**NEW QUESTION: 1** Which of the following components MUST be trusted by all parties in PKI? **A. CAB. Private key C. Recovery key D. Key escrow**  
**Answer: A**  
**Explanation:** A certificate authority (CA) is an organization that is responsible for issuing, revoking, and distributing certificates. In a simple trust model all parties must trust the CA. In a more complicated trust model all parties must trust the Root CA. **Incorrect Answers:** A. Key escrow is nothing that needs to be trusted. Key escrow addresses the possibility that a third party may need to access keys. Under the conditions of key escrow, the keys needed to encrypt/decrypt data are held in an escrow account (think of the term as it relates to home mortgages) and made available if that third party requests them. The third party in question is generally the government, but it could also be an employer if an employee's private messages have been called into question. C. A private or secret key is an encryption/decryption key known only to the party or parties that exchange secret messages. D. A recovery key has no specific function within a PKI. **References:** Dulaney, Emmett and Chuck Eastton, CompTIA Security+ Study Guide, 6th Edition, Sybex, Indianapolis, 2014, pp. 262, 278-290

**NEW QUESTION: 2** An input to the Identify Stakeholders process is: **A. Procurement documents. B. The project management plan. C. The stakeholder register. D. Stakeholder analysis.**
