NEW QUESTION: 1You administer client computers that have Windows 7 Professional SP1 64-bit installed. All the computers are members of a single Active Directory domain. You need to prevent users from installing non-trusted device drivers. What should you do?
A. Enable the Code signing for device drivers in a domain Group Policy.
B. Disable the Code signing for device drivers in a domain Group Policy.
C. Add each user to a Domain Admins group.
D. Run the sigverif.exe command on each computer.
Answer: A

NEW QUESTION: 2There are basic goals of Cryptography. Which of the following most benefits from the process of encryption?
A. Confidentiality
B. Non-Repudiation
C. Authentication
D. Integrity
Answer: A
Explanation: Confidentiality makes sure that the required level of secrecy is applied at each junction of data processing and prevents unauthorized disclosure. Encrypting data as it is stored and transmitted, enforcing strict access control and data classification, and teaching employees on the correct data protection procedures are ways in which Confidentiality can be provided.
Incorrect Answers: B: Authentication refers to the verification of the identity of a user who is requesting the use of a system and/or access to network resources.
C: Integrity is upheld by providing assurance of the accuracy and reliability of information and systems and preventing any unauthorized modification.
D: Non-Repudiation makes sure that a sender is unable to deny sending a message.
