NEW QUESTION: 1You have a Microsoft 365 subscription that uses a default domain name of contoso.com. The multi-factor authentication (MFA) service settings are configured as shown in the exhibit. (Clock the Exhibit tab.) In contoso.com, you create the users shown in the following table. What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation

NEW QUESTION: 2Examine the contents of /etc/mail/access: Connect: localhost.localdomain RELAY Connect: localhost RELAY Connect: 127.0.0.1 RELAY This system is to be used as an MTA or mail gateway for the local LAN network address 192.168.1.0/24. Which two actions allow this mail host to route email for the network? **A.** Run sendmail again; and the updated file can be accessed automatically. **B.** Add this line to /etc/mail/access: From: 192.168.1.0 RELAY **C.** Rebuild the access database file after the source files have been modified. Restarting the sendmail service automatically rebuilds the maps. **D.** Add this line to /etc/mail/access: Connect: 192.168.1 RELAY **E.** Add this line to /etc/mail/access: To: 192.168.1 RELAY **Answer: B, C**

NEW QUESTION: 3A company has Windows Server 2012 R2 servers that have the Hyper-V role installed. The guest virtual machines are configured as follows: You need to configure the environment to support the creation of failover clusters. What should you do? **A.** Convert the virtual machines to Generation 2 virtual machines. **B.** Upgrade the operating system to Windows Server 2012 R2. **C.** Convert the operating system drive to use the virtual hard disk (VHD) file format. **D.** Convert the data drives to use the VHDX file format. **Answer: D** Explanation: Shared virtual hard disk functionality in guest failover clusters exclusively uses the .vhdx file format. Although the shared virtual hard disk must use the .vhdx file format for the data drive, the operating system disk for a virtual machine can use either the .vhd or the .vhdx file format. Generation 1 and Generation 2 virtual machines are supported in a guest failover cluster using a shared virtual hard disk. <http://technet.microsoft.com/en-us/library/dn281956.aspx> Ref: <http://www.petri.co.il/create-guest-clusters-windows-server-2012-hyper-v.htm>

NEW QUESTION: 4You are configuring a new SQL Server installation. The SQL Server instance will be used for both online analytical processing (OLAP) and relational data. The data in the

server is accessed frequently. You can configure the services, startup type, and accounts used by the services that run on the server according to the following table: You want to raise the level of security on the server. You need to minimize the surface area for potential attacks on the server. What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.) **A.** Change the Startup type property for all the services to Manual. **B.** Create three different non-administrative local user accounts and assign them to each of the services. **C.** Create a single non-administrative local user account and assign it to each of the services. **D.** Change the Startup type property for all the services to Disabled. **Answer: B** Explanation: Explanation/Reference:---Anonymous--Answer is D. From Microsoft's best practices point of view every service should have its own service account. C. Is a correct answer you can select this option due to the installation of an SQL 2008 instance but is not recommended as best practice. Official site: <http://msdn.microsoft.com/en-us/library/cc281953.aspx> You can assign the same login account to all SQL Server services, or you can configure each service account individually. You can also specify whether services start automatically, are started manually, or are disabled. Microsoft recommends that you configure service accounts individually to provide least privileges for each service, where SQL Server services are granted the minimum permissions they need to complete their tasks.
