torrent, you can make the most of your free time.

We believe that our ESG-Investing exam files will be most convenient for all people who want to take an exam, We never beautify our image but show our progress as prove.

Also make sure that you understand the concepts **ESG-Investing Sample Test Online** of CFA Institute in general and in CFA Institute governance, Full refund with failed exam transcript.

**NEW QUESTION: 1**  
**CORRECT TEXT**  
**Answer:** Explanation: Here are the Steps for this Lab Solution: Explanation: The above named organization has 14 hosts that need to access the internet simultaneously but were provided with just 6 public IP addresses from 198.18.184.105 to 198.18.184.110/29. In this case, you have to consider using NAT Overload (or PAT). Double Click on the Weaver router to access the CLI. Router> enable Router# configure terminal First you should change the router's name to Weaver: Router(config)#hostname Weaver Create a NAT pool of global addresses to be allocated with their netmask: Weaver(config)# ip nat pool mypool 198.18.184.105 198.18.184.110 netmask 255.255.255.248 Create a standard access control list that permits the addresses that are to be translated: Weaver(config)#access-list 1 permit 192.168.100.16 0.0.0.15 Establish dynamic source translation, specifying the access list that was defined in the prior step: Weaver(config)#ip nat inside source list 1 pool mypool overload Finally, we should save all your work with the following command: Weaver#copy running-config startup-config (Don't forget this) Check your configuration by going to "Host for testing" and type: C : >ping 192.0.2.114 The ping should work well and you will be replied from 192.0.2.114 This command translates all source addresses that pass access list 1, which means a source address from 192.168.100.17 to 192.168.100.30, into an address from the pool named mypool (the pool contains addresses from 198.18.184.105 to 198.18.184.110) Overload keyword allows to map multiple IP addresses to a single registered IP address (many-to-one) by using different ports. The question said that appropriate interfaces have been configured for NAT inside and NAT outside statements. This is how to configure the NAT inside and NAT outside, just for your understanding: Weaver(config)#interface fa0/0 Weaver(config-if)#ip nat inside Weaver(config-if)#exit Weaver(config)#interface s0/0 Weaver(config-if)#ip nat outside Weaver(config-if)#end

**NEW QUESTION: 2** You are currently running BGP-based VPLS and Layer 3 VPNs. You are asked to consolidate the services and deploy EVPN to replace the VPLS and Layer 3 VPN deployments. Which two EVPN route types will achieve this goal? (Choose two.) **A.** Type 4 **B.** Type 7 **C.** Type 2 **D.** Type 5 **Answer: C, D** Explanation: [https://www.juniper.net/documentation/en\\_US/junos/topics/concept/evpn-route-type5-understanding.html](https://www.juniper.net/documentation/en_US/junos/topics/concept/evpn-route-type5-understanding.html)

**NEW QUESTION: 3** What is the purpose of the pre-defined exclusions included with SmartEvent R76? **A.** To give samples of how to write your own exclusion. **B.** As a base for starting and building exclusions. **C.** To allow SmartEvent R76 to function properly with all other R71 devices. **D.** To avoid incorrect event generation by the default IPS event definition; a scenario that may occur in deployments that include Security Gateways of versions prior to R71. **Answer: D**

**NEW QUESTION: 4** Ihr Netzwerk enthält eine Active Directory-Gesamtstruktur mit dem Namen contoso.com. Die Gesamtstruktur enthält eine AD FS-Farm (Active Directory Federation Services). Sie installieren Windows Server 2016 auf einem Server mit dem Namen Server2. Sie müssen Server2 als Knoten in der Verbundserverfarm konfigurieren. Welche Cmdlets sollten Sie ausführen? Wählen Sie zum Beantworten die entsprechenden Optionen im Antwortbereich aus. **Answer:** Explanation:
