NEW QUESTION: 1 Johnson Chemical Company has developed a new synthetic lubricant for machinery which is protected by a confidentiality agreement. Which form of intellectual property is this MOST likely classified under? **A.** Copyright **B.** Patent **C.** Trademark **D.** Trade secret
Answer: D
Explanation: Johnson Chemical Company has developed a new synthetic lubricant for machinery which is protected by a confidentiality agreement. This form of intellectual property is MOST likely classified under a trade secret. A trade secret is commercial information describing a plan, process, or mechanism which is only known by the owner and a limited number of others, and is commonly protected by a confidentiality agreement. A copyright is protection provided by law for authors and creators of intellectual property providing for exclusive rights to publish. A trademark is an identifying label, symbol, or words which exclusively identify a product or service. A patent is a monopoly created by law that gives the patent holder the sole right to make use or sell an article and prevent others from doing so without their permission.
