You must use WLST or a JVM command- line tool.**Answer: C**

NEW QUESTION: 4Project ScenarioCalendar Project (Note: The companies and people within the scenario are fictional.) There has been a reduction in the number of orders at the MNO Manufacturing Company due in part to the increased marketing activities of its competitors. To help counter this, the company has decided to create a promotional calendar for next year for all its current and prospective customers. The end product of this project will be a prepared calendar pack, ready for printing. The design of the calendar will be similar to one sent out previously, and must reflect the company image as described in the existing corporate branding standards. Another project is currently producing a new company logo when is to be printed on each page of the promotional calendar. The prepared calendar pack will consist of:*

Design for each month - correctly showing at public holidays and new company logo* Selected photographs- 12 professionally-produced photographs, showing different members of staff* Selected paper and selected envelope - for printing and mailing the calendar* Chosen label design - a competition to design a label will be held as part of this project* List of customers - names and addresses of customers to whom the calendar will be sent. The project is currently in initiation and will have two further stages: Stage 2 will include the activities to: * Create the customer list using information from the Accounts and Marketing departments* Confirm compliance with the Data Protection Legislation* Create a design for each month - this will be done by the internal creative team* Select and appoint a professional photographer* Gather photograph design ideas from previous project and agree photographic session schedule* Prepare a production cost forecast* Select paper and envelope. Stage 3 will include the activities to: * Produce and select the professionally-taken photographs* Hold the label design competition and choose the label design* Assemble the prepared calendar pack. A production cost forecast, based on the options and costs for the paper, envelope, printing and marketing of the calendar is to be produced in stage 2. However, the actual production and distribution of the calendars is not within the scope of the project. The product cost forecast will be reviewed by the Project Board to determine whether the project should continue. It is now 05 October and the prepared calendar pack must be delivered to the print company by 30 November, to enable printing and distribution of the calendar in time for Christmas. The cost of the activities to develop the specialist products and the cost of the project management activities are estimated to be £20,000. There is a project time tolerance of +1 week / -2 weeks and a project cost tolerance of +£6,000 / -£6,000. A change budget of £500 has been allocated but there is no risk budget. During stage 2, an early review of the photo design ideas from the Marketing department has highlighted the need for engineering machinery to be operating in the background during the photo sessions. This requires a change to the baselined Product Description for the photos. What action should the Project Manager take? **A.** Revised the Product Description for the photos and issue it to the Engineering Manager to ensure that the machinery will be operating during the photo sessions. **B.** Log the change in the Issue Register as a request for change. **C.** Include this requirement on the next Checkpoint Report to the photographer. **D.** Raise an Exception Report to the Project Board. **Answer: B**
