NEW QUESTION: 2 When an API is being leveraged, it will encapsulate its data for transmission back to the requesting party or service. What is the data encapsulation used with the SOAP protocol referred to as? **A.** Payload **B.** Envelope **C.** Object **D.** Packet **Answer: B**

Explanation/Reference: Explanation: Simple Object Access Protocol (SOAP) encapsulates its information in what is known as a SOAP envelope. It then leverages common communications protocols for transmission. Object is a type of cloud storage, but also a commonly used term with certain types of programming languages. Packet and payload are terms that sound similar to envelope but are not correct in this case.

NEW QUESTION: 3 You need to secure the contents of your entire hard disk drive even if an unauthorized user steals your computer. Which method should you use? **A.** BitLocker encryption **B.** File-level share permissions **C.** Password-protection **D.** Rights Management Services **Answer: A**
