NEW QUESTION: 1You need to create a high performance shared file system, and have been advised to use file storage service (FSS). You have logged into the Oracle Cloud Infrastructure console, created a file system, and followed the steps to mount the shared file system on your Linux instance. However, you are still unable to access the shared file system from your Linux instance. What is the likely reason for this?
A. There is no route in your virtual cloud network's (VCN) route table for mount target traffic
B. There is no Identity and Access Management (IAM) policy set up to allow you to access the mount target
C. There is no internet gateway set up for mount target traffic
D. There are no security list rules for mount target traffic
Answer: B

NEW QUESTION: 2The nurse notes multiple bruises on the arms and legs of a newly admitted client with lupus. The client states, "I get them whenever I bump into anything." The nurse would expect to note a decrease in which of the following laboratory tests?
A. Number of platelets
B. WBC count
C. Number of lymphocytes
D. Hemoglobin level
Answer: A
Explanation:
Explanation(A) Thrombocytopenia, a decrease in platelets, occurs in lupus and causes a decrease in blood coagulation and thrombus formation. (B) Clients with lupus will have a decrease in the WBC count decreasing their resistance to infection. (C) Clients with lupus may have a decrease in the hemoglobin level causing anemia. (D) Leukopenia, a decrease in white blood cells, is seen in lupus and decreases resistance to infection.
