NEW QUESTION: 1You are using A/B testing feature of campaign management to maximize the efficiency of your e-mail campaigns. Which criteria determine the winner during A/B testing? (2)
A. Sentiment score**B.** Rate of opened messages**C.** Unique click rate**D.** Top categories**Answer: B,C**

NEW QUESTION: 2How are I/O timeout and Safety I/O timeout calculated?**A.** An I/O connection will timeout based on the lower of 3x RPI or 100ms. Safety I/O timeout is calculated as 3xRPI.**B.** An I/O connection will timeout based on the lower of 3x RPI or 150ms. Safety I/O timeout is calculated as 3xRPI.**C.** An I/O connection will timeout based on the lower of 4x RPI or 150ms. Safety I/O timeout is calculated as 2xRPI.**D.** An I/O connection will timeout based on the lower of 4x RPI or 100ms. Safety I/O timeout is calculated as 4xRPI.**Answer: D**

NEW QUESTION: 3After replacing an Onboard Administrator (OA). the firmware revision levels differ between the primary and secondary What is the fastest way to update the lower version?
A. Download the firmware and upgrade using CLIB**B.** Launch the OA GUI and synchronize**C.** Download the firmware and upgrade using the GUID**D.** The OA will automatically synchronize
Answer: BExplanation:

<http://h20000.www2.hp.com/bc/docs/support/SupportManual/c00705292/c00705292.pdf> - Pagelf redundant Onboard Administrator firmware versions do not match, the settings are not automatically synchronized.Synchronize the firmware by using the Insight Display, GUI, or CLI command, and then the settings are automatically synchronized to the replaced Onboard Administrator module.Here are Insight Display screenshots I just captured to show the sequence:The Insight Display will show a Config error if two OA modules have different firmware versionsa.Navigating to the particular error details will show Firmware Mismatch on the module with the oldest firmwareb.Selecting Fix on that screen will show possible corrective action:c.Pressing Accept will synchronize the firmware from the module with the newest version to the module with the oldest versiond.After the firmware is updated on that module - the enclosure settings will be automatically synchronized to that module and OA redundancy will be restored2. If the service person changing the OA module does not synchronize the firmware - this can be accomplished through the OA GUI or OA CLI commands documented in those guides.
