The format of IBM C1000-189 exam dumps that is pdf.

NEW QUESTION: 1 A System Administrator wants to configure an XGS to send all IPS security event alerts to a remote system using Syslog. How should the System Administrator configure the XGS? **A.** Edit the IPS Policy object and add a 'Remote Syslog' response object. **B.** Configure 'System Alerts' with 'Remote Syslog' response objects. **C.** Edit the signatures inside the IPS Policy object and add a 'Remote Syslog' response object. **D.** Edit the Network Access policy object and add a 'Remote Syslog' response object. **Answer: D** Explanation: You can configure remote syslog for the IPS objects in both, the SiteProtector Console and the LMI, from the Network Access Policy (NAP) or the Shared Objects one. SiteProtector Network Access Policy configuration: References: <http://www-01.ibm.com/support/docview.wss?uid=swg21662575>

NEW QUESTION: 2 Your company has created a set of keys using the AWS KMS service. They need to ensure that each key is only used for certain services. For example, they want one key to be used only for the S3 service. How can this be achieved? Please select: **A.** Create a bucket policy that allows the key to be accessed by only the S3 service. **B.** Create an IAM policy that allows the key to be accessed by only the S3 service. **C.** Define an IAM user, allocate the key and then assign the permissions to the required service. **D.** Use the kms:ViaService condition in the Key policy. **Answer: D** Explanation: Explanation Option A and B are invalid because mapping keys to services cannot be done via either the IAM or bucket policy Option D is invalid because keys for IAM users cannot be assigned to services This is mentioned in the AWS Documentation The kms:ViaService condition key limits use of a customer-managed CMK to requests from particular AWS services. (AWS managed CMKs in your account, such as aws/s3, are always restricted to the AWS service that created them.) For example, you can use kms:V1aService to allow a user to use a customer managed CMK only for requests that Amazon S3 makes on their behalf. Or you can use it to deny the user permission to a CMK when a request on their behalf comes from AWS Lambda. For more information on key policy's for KMS please visit the following URL:

<https://docs.aws.amazon.com/kms/latest/developerguide/policy-conditions.html> The correct answer is: Use the kms:ViaService condition in the Key policy Submit your Feedback/Queries to our Experts
